Sale Manager's Notes:

The Jarvis Hills herd, owned by Jim and Doris Bollech since 1979, has a reputation for satisfied buyers of Registered Guernsey genetics. Jim and Doris have decided it is time to retire and the entire herd is now being offered for sale. As can be seen on this page, many have gone on to excel for their new owners. Similar results can be expected from the many fine animals included in this sale. The herd is milked in a tie-stall barn, fed grain and hay in the winter and pastured in the summer. The last two Somatic Cell Counts were 114,000 and 96,000. No BST has ever been used. The entire herd has tested negative to a Johnes ELISA test in 2005 and 2006. Milk weights and Somatic Cell information will be provided on sale day.
